The **CIS Meter Read Cycle** (last column) is a new cycle number utilized by UGI's CIS System starting September 5th, 2017 following our migration to a new CIS System.

UGI's Gas Management website, however, will continue to reference Non-Choice Transportation accounts as belonging to the legacy **Work Day Control** (first column) for screens listing accounts and pools on the website. Non-Choice Transportation Customers that are billed calendar month will remain referred to as cycle 99 with a 1st of the month read date.
